

GRE® Subject Test Interpretative Data

Subject Test Total Score Information

To help interpret scaled scores, the GRE Program describes scores in terms of their standing in appropriate reference groups. Table 2A provides summary statistics for each of the GRE Subject Tests, including number of test takers, mean and standard deviation of scaled scores, and percent of the group by gender. The table is based on all individuals who tested between July 1, 2022, and June 30, 2025. Test takers who received a No Score (NS) are excluded from the data reported in the accompanying tables.

Table 2A: Performance Statistics on the GRE Subject Tests
(Based on the performance of all individuals who tested between July 1, 2022, and June 30, 2025)

Test	Number of Test Takers	Mean	Standard Deviation
Mathematics Test	5,770	688	162
Physics Test	4,760	733	167
Psychology Test	2,278	584	114

Note: For Mathematics a total of 21 percent of test takers indicated they were female, 77 percent indicated they were male; Physics a total of 21 percent of test takers indicated they were female, 77 percent indicated they were male; Psychology a total of 75 percent of test takers indicated they were female, 23 percent indicated they were male. For all Subject Tests, two percent indicated they were either non-binary, preferred to self-describe, or preferred not to answer.

Table 2B on the following page provides percentile ranks for the Subject Test total scores. The percentile ranks are based on the percent of test takers scoring below a particular scale score. The data are based on all individuals who tested between July 1, 2022, and June 30, 2025.

Table 2B: GRE Subject Test Total Score Interpretive Data Used on Score Reports

(Percent of test takers scoring lower than selected scaled scores. Based on the performance of all individuals who tested between July 1, 2022, and June 30, 2025)

Blank cells imply that percentile information was not reported because there were no test takers above or below the specified scale score range.
